## Experience

**Pharmacy Technician**  
Walmart Pharmacy

**Mar. 2021 - Present**

- Utilized the **electronic records system (Kroll)** for efficient patient record and prescription management.
- Managed Covaxon for COVID-19 vaccine **record-keeping, ensuring data accuracy.**
- Enhanced prescription processing by working with the team and communicating strategies to complete tasks at hand.
- Provided quality **customer support over the phone and in person** for guidance in a high-volume setting.
- Conducted staff training on pharmacy software, emphasizing precision and adherence to health regulations.

**Freelance Custom PC Builder**

**Dec. 2019 - Present**

- Tailored PC builds to meet client needs and budget constraints.
- Ensured part compatibility for optimal system performance, leveraging **online resources and research.**
- Strategically sourced components cost-effectively without compromising quality.
- **Assembled PCs** with attention to detail and functionality, delivering custom-built solutions.

**Design and Brand Development**

- Developed a brand identity for Alpha Mix Grooming by pitching the **design, website, and marketing** to a client.
- Gained experience in graphic design, logo creation, product label design, and marketing.
- **Successfully created a brand**, including a logo, product labels, and a website, and was able to **sell out all our products** with my client.

## Projects

**Bionic Reading Application - HTML, CSS**

- Developed a program to improve reading by highlighting the first couple letters of words that users input, for individuals with ADHD or reading difficulties using the "bionic reading" method to read at a faster rate.
- Gained experience in **coding HTML** to create the program, and research ways to **improve day-to-day tasks** such as reading.
- Created a program I **use daily to improve my reading speed** and complete tasks faster.

**Music Playlist Application - JavaScript, HTML, CSS**

- Developed an application that uses Apple Music API to create music playlists that can be done by the user.
- Acquired Knowledge in **integrating APIs** and creating user-friendly interfaces using **Javascript, HTML, and CSS.**
- Created a functioning music playlist application that is integrated with Apple Music API so you can add all your favorite songs.

**Interactive Calendar Application - JavaScript, HTML, CSS**

- Built an interactive web-based calendar application where the user can put notes on each day and export the calendar into a jpg.
- Enhanced my knowledge of **web development** and dynamic user interfaces.
- Developed a calendar application with **PDF export capability** that I use every month to organize my schedule.
