## EDUCATION

### Carleton University | Bachelor of Computer Science

Computer and Internet Security Stream

Expected Apr. 2027

Ottawa, ON

**Relevant coursework:** Object-Oriented Software Engineering, Database Management Systems, Operating Systems, Computer Systems Security, Principles of Computer Networks, Software Structures for User Interfaces

## EXPERIENCE

### Client Support Engineer

Department of National Defence (DND)

Apr. 2026 – Present

Ottawa, ON

- Support capital programs and projects by gathering client requirements, analyzing workflows, and delivering project-management and engineering solutions.
- Designed and built ATLAS (Action Tracking, Logging and Activity System), a Power Apps solution that converts AI-generated meeting summaries into structured, trackable actions.
- Configured ATLAS to track Offices of Primary Interest (OPIs), priorities, status, source records, attachments, and progress; automated task creation and record updates with Power Automate.
- Develop, test, troubleshoot, and improve internal applications and automated workflows with a multidisciplinary team; advise benefits-realization teams on requirements and solution design.

### Junior Application Developer / Benefits Realization Junior Project Officer

Department of National Defence (DND)

Sept. 2025 – Apr. 2026

Ottawa, ON

- Developed an end-to-end Power Apps solution to track projects and programs across their lifecycles using Power Fx, Power Automate, SharePoint, and JavaScript.
- Created data structures, automated workflows, dashboards, wireframes, demonstrations, and web/Python prototypes to translate business requirements into testable solutions.
- Collaborated across business and technical teams on benefits-realization frameworks, standardized approaches, and option analyses; produced SOPs, user guidance, and transition documentation.

### IT-01 Technical Analyst

Royal Canadian Mounted Police (RCMP)

Sept. 2024 – Aug. 2025

Ottawa, ON

- Worked on an operational support team serving RCMP employees, Federal Policing personnel, and external partners; provided first-level support for 200+ applications, devices, and systems.
- Resolved software, hardware, account, access, and connectivity issues through tickets and call-centre requests; documented troubleshooting, managed permissions, and escalated complex incidents while protecting sensitive information.

### Operations Manager / Systems & Automation Specialist

Wellington Cowork

Dec. 2025 – Present

Ottawa, ON

- Manage coworking and virtual-mail operations, including client onboarding, tours, bookings, invoicing, payments, mail notifications, scanning, forwarding, and vendor coordination.
- Built and maintain the office technology environment, CRM, integrations, and Framer website; provide technical support and implement new systems and digital services.
- Automate lead management, email communications, and operational workflows with GoHighLevel, Zapier, forms, and related tools; managed Airbnb reservations, guest communications, check-ins, and property readiness from Dec. 2025 to Mar. 2026.

## PROJECTS

### ESP32 Wireless Security Analyzer

ESP32, C++, NRF24L01+, TFT

- Adapted open-source firmware for an authorized wireless-security lab; integrated an NRF24L01+ module and manually wired and debugged an SPI TFT interface.

### Modular Thermal and Low-Light Imaging Platform

In Progress

- Designing a modular prototype that combines thermal and low-light sensors for imaging, visualization, and controlled testing.

### Ultra-Wideband Personnel and Equipment Positioning System

In Progress

- Prototyping a UWB system that estimates and displays the relative locations of tagged personnel and equipment.

### ESP32 Mesh Communication Network

In Progress

- Developing a multi-node ESP32 mesh prototype for decentralized messaging and telemetry exchange.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, Java, C/C++, SQL, HTML/CSS, Bash

**Platforms & tools:** Power Apps, Power Fx, Power Automate, SharePoint Online, GoHighLevel, Zapier, Framer, Git, React, Node.js, VS Code, IntelliJ

**Hardware & spoken languages:** ESP32, Raspberry Pi, SPI/I2C/UART | English, French, Farsi

## CREDENTIALS & AWARDS

- French Immersion High School Diploma and French Language Certificate.
- Google Analytics and Inbound Marketing certificates; Dean's Entrance Scholarship for Academic Excellence.
