EDUCATION

Carleton University | Bachelor of Computer Science Expected Apr. 2027
Computer and Internet Security Stream *Ottawa, ON*
Relevant coursework: Object-Oriented Software Engineering, Database Management Systems, Operating Systems, Computer Systems Security, Principles of Computer Networks, Software Structures for User Interfaces

EXPERIENCE

Operations Manager / Systems & Automation Specialist Dec. 2025 - Present
Wellington Cowork *Ottawa, ON*
- Manage day-to-day coworking and virtual-office operations, including **sales, office tours, client onboarding, bookings, invoicing, payments, mail services, and vendor coordination**.
- Built and maintain the **CRM and sales pipeline in GoHighLevel**, automating lead follow-up, onboarding, payment recovery, client communications, and operational workflows through Zapier and integrated tools.
- Develop **AI-assisted automations** for email response, lead handling, internal workflows, and client support; maintain the Framer website, CRM integrations, and office technology environment.

Client Support Engineer Apr. 2026 - Aug. 2026
Department of National Defence (DND) *Ottawa, ON*
- Meet with **stakeholders and client teams** to gather requirements, identify operational needs, and design technical solutions using AI, automation, and Microsoft Power Platform.
- Designed **ATLAS (Action Tracking, Logging and Activity System)**, an AI-enabled Power App that extracts meeting tasks and assigns titles, OPIs, tags, priorities, deadlines, and other task information.
- Built **ATLAS dashboards and team workspaces** to centralize task tracking, display progress, and provide separate teams with controlled access to their actions and records.
- Developed solutions supporting **Continuous Capability Sustainment (CCS) and Benefits Realization**, digitizing project assessments, cost analysis, performance tracking, and decision-support processes.
- Built an automated **Monte Carlo cost simulation** integrating Power Apps, SharePoint, Excel, and Office Scripts to run 10,000 simulations and generate risk-based cost estimates.
- Initiated a **building-wide Desk Finder**, repurposing an internal open-source personnel database to map employee seating and create an interactive digital representation of each floor.

Junior Application Developer / Benefits Realization Junior Project Officer Sept. 2025 - Apr. 2026
Department of National Defence (DND) *Ottawa, ON*
- Developed an end-to-end Power Apps solution to track projects and programs across their lifecycles using Power Fx, Power Automate, SharePoint, and JavaScript.
- Created data structures, automated workflows, dashboards, wireframes, demonstrations, and web/Python prototypes to translate business requirements into testable solutions.
- Collaborated across business and technical teams on benefits-realization frameworks and option analyses; produced SOPs, user guidance, and transition documentation.

IT-01 Technical Analyst Sept. 2024 - Aug. 2025
Royal Canadian Mounted Police (RCMP) *Ottawa, ON*
- Provided first-level operational support for **200+ applications, devices, and systems** used by RCMP employees, Federal Policing personnel, and external partners.
- Resolved software, hardware, account, access, and connectivity issues; documented troubleshooting, managed permissions, and escalated complex incidents while protecting sensitive information.

PROJECTS

ESP32 Wireless Security Analyzer ESP32, C++, NRF24L01+, TFT
- Adapted open-source firmware for an authorized wireless-security lab; integrated an NRF24L01+ module and manually wired and debugged an SPI TFT interface.

Modular Thermal and Low-Light Imaging Platform In Progress
- Designing a modular prototype combining thermal and low-light sensors for imaging, visualization, and controlled testing.

Ultra-Wideband Personnel and Equipment Positioning System In Progress
- Prototyping a UWB system that estimates and displays the relative locations of tagged personnel and equipment.

ESP32 Mesh Communication Network In Progress
- Developing a multi-node ESP32 mesh prototype for decentralized messaging and telemetry exchange.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C/C++, SQL, HTML/CSS, Bash
Platforms & tools: Power Apps, Power Fx, Power Automate, SharePoint Online, Microsoft 365, Excel/Office Scripts, GoHighLevel, Zapier, Framer, Git, React, Node.js, VS Code, IntelliJ
Hardware & spoken languages: ESP32, Raspberry Pi, SPI/I2C/UART | English, French, Farsi

CREDENTIALS & AWARDS

- French Immersion High School Diploma and French Language Certificate.
- Google Analytics and Inbound Marketing certificates; Dean's Entrance Scholarship for Academic Excellence.
